

K975

Strong hold

Strong, robust K975 folding bulk container is the industrial standard for heavy-duty bulk handling and distribution applications.

Features & Benefits

Space and cost efficient

- With an internal capacity of 780 litres.
- Folds to only 406mm (385mm when stacked) and allows efficient return of cloth dunnage systems.

Saves time

- K975 can be erected or folded by a single operator.

Product Protection

- Smooth internal surfaces protect contents.
- Optional lid offers protection from elements.

Versatile

- Drop doors allow easy access, even when stacked, preventing users leaning into part empty containers.
- Half height 384 litre version also available

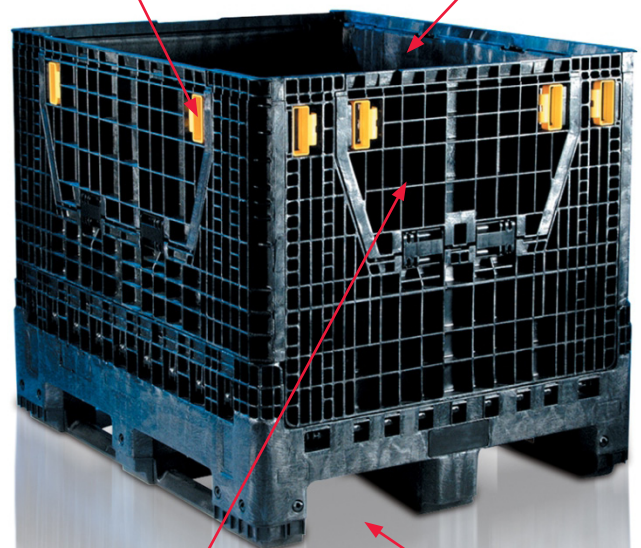

Strong and durable

- K975 stacks 5 high carrying a 500Kg unit load.
- Working temperature range from -40°C to +80°C.
- Resistant to impact, weather and most chemicals
- Manufactured in tough, durable HDPE, K975 provides upwards of seven years continuous use and can be recycled at the end of its long working life.

Secure catches for drop-doors and sides

Strong, durable construction, component parts are easily replaced should they become damaged

Drop doors on two sides

Wide-width fork entry eases and speeds access for forklifts and reduces accidents
