Euro Shelving

Heavy duty shelving system

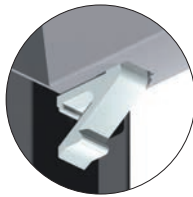

Product Datasheet

Euro Shelving - Heavy duty adjustable shelving

Stormor Shelving is a truly versatile and interchangeable system ideal for office or departmental storage, storerooms, stockrooms, maintenance stores and industry in general.

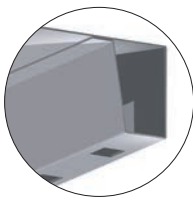

- 3 frame types, open, X braced and solid clad all available in 3 duties.
- Shelves and storage accessories are a common fitting to all frames styles.
- Accessories feature clip-in fitting so that any changes are quickly and easily made.
- Wide range of sizes and load capacities
- Specially designed "T" profile uprights and welded box section beams maximise the strength of the system.
- UK manufactured to ISO certified quality and environmental standards.

Simply slot the clip into the uprights to create an extremely rigid structure yet allowing for quick and easy re-positioning of shelves.

For safety, shelf support clips are designed to prevent accidental shelf dislodgement whilst being extremely easy to use.

Shelves utilise box section construction at the front and rear for load bearing strength and rigidity.

Upright caps locate in top of uprights to provide capping for safety and improved appearance

Cross brace provides rear bracing & stability for open back shelving bays.

Choice of 3 upright duties to meet various loads and applications

Rear cladding, closes off the rear of the shelf level, stopping items from falling out of the back of bays

Clad frames stop products stored on adjacent bays from getting mixed together

Foot plates spread loads of the upright, protecting the floor surface and allowing shelving to be fixed to the floor for stability, when required

Standard colours

Euro Shelving with Light Grey powder coated finish contains ActiveCoat antimicrobial technology which minimises the risk of bacterial cross-contamination.

Euro Shelving is a versatile modular shelving solution for manual storage of medium and heavy duty loads.

Euro Shelving can also be designed as a tiered shelving structure, helping to maximise storage capacity, reduce picking times, improving efficiency.

With it's range of accessories Euro shelving offers great versatility for storing goods of varying sizes.

Euro shelving primary components

Modular in design for ease of assembly, Euro Shelving offers almost limitless scope for the creation of customised storage facilities; and a complementary range of accessories extends its capabilities still further.

Frame types

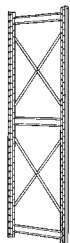

Frames are slotted on a 50mm pitch for shelf adjustment.

Frames available in heights of 1050 to 3600mm in 150mm increments.

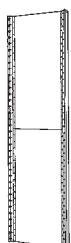

Frame depths mm							
250	300	400	450	500	600	750	900

Open frame

Open braced frame

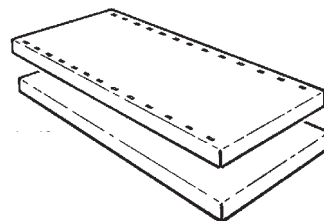

Clad frame

Shelves

Shelves have slot piercings to accept dividers.

Manufactured in 3 duties, standard, heavy and extra heavy, shelves are available to match all frame depths.

Shelves have slot piercings to accept dividers and sit on 4 shelf clips.

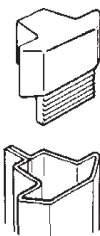

Locking shelf clip

4 required per shelf.

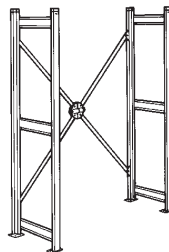

Upright cap

Locates in top of uprights to provide capping for safety and makes uprights flush with the top shelf.

Cross bracing

Provides essential stability bracing for open back shelving bays.

Rear cladding

Provides rear bracing & stability for closed/clad back shelving bays. Stops items being pushed off the rear of shelves.

Euro Shelving is ideal in automotive and engineering environments, delivering organised small parts storage.

Using pin hinge doors allows cupboards to be created within shelving runs to offer secure storage for valuable items.

Mobile Euro shelving maximises storage capacity, making it particularly effective for bulk archives where documents have to be retained for long periods of time.

Euro Shelving Accessories

Modular in design for ease of assembly, Euro Shelving offers almost limitless scope for the creation of customised storage facilities; and a complementary range of retro fit accessories extends its capabilities still further.

Shelf bin fronts - Retain loose components for order picking. Available flat, or angled at 50°.

Part-height shelf dividers - Partition shelves to create storage bins. Adjustable across the shelf width.

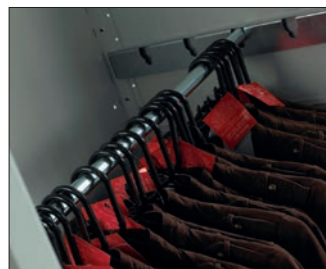

Full-height shelf dividers - Used to divide shelves horizontally into smaller compartments.

Floor trim - Provides a dust barrier between the base shelf and the floor. Prevents the loss of valuable items under the bottom shelf.

Pin hinge doors - With 3-point locking. Door Heights: full (shown) 2100mm, half 1100mm.

Garment hanging - Adjustable rails and brackets. Three rail slot positions in 300, 400, 450 & 500mm deep brackets and 5 rail slot positions in 600 & 750mm.

Pull-out suspension filing cradle - Can accommodate A4 and foolscap top loaded suspension files. Cradle slides on telescopic slides.

Pull-out reference shelf - Slides out from the bay on telescopic slides. Provides a flat and stable work surface within a storage bay.

Pull-out drawer - Pull-out drawer is available in 3 standard heights. Ideal for the storage of small items within a shelving bay.

Plastic drawers - Integrated back stop cantilevers the drawer, providing easy access to small items. Available in 3 sizes.

Cable reel storage - Reels are located on a central rail allowing easy dispensing of cable.

Vertical Storage - Stores long thin items on their ends for better space utilisation within a shelving bay.

Corner Shelf Support Channel - Allows for creation of corner and 'U' shaped Euro shelving units.

Louvre panels - Fitted to end frames to carry plastic containers or steel spigots for hanging storage of tools, components or materials.

Plastic containers - Useful open top plastic storage boxes, available in a range of sizes and colours.
