

Flammable Vaults 53 SERIES

HEAVY DUTY

These flammable liquid storage vaults are of fully welded construction, fabricated from 2.0mm thick steel sheet with single skinned walls. Internally the vaults have a sealed integral sump with a drain plug outlet and hi lo vents fitted with flash arrest copper mesh. The full-area, lift up lid is mounted on heavy-duty pin hinges supported by a pair of gas-springs (one of which is locking) to support the lid in the open position. Secured by a matched pair of five lever mortice locks with a heavy duty hasp and staple provided for padlock if required (padlock not supplied).

Flat Top Bins 55 SERIES

MEDIUM DUTY

These hard wearing flammable storage bins are constructed from 1.2mm sheet steel with a flat top and sealed, removable sump tray making them perfect for the secure storage of larger bottles of hazardous material. These units are fitted as standard with a hinged, flat lid and secured by hasp and staple. These reliable and tough storage solutions come in range of standard Hazard colours including Traffic Red (RAL 3020).
