The In Charge™ Locker range, provides a safe environment for charging laptops, tool batteries, mobile phones, iPads and other electronic devices.

Ideal for;

- Schools, Colleges and Universities
- Construction Site Cabins
 - Commercial Offices
- Public Reception Areas

In Charge™ Lockers - providing power to your security

With trailing cables, the risk of theft and health & safety issues, finding access to safe and protected power points is a common problem in today's workplace.

In Charge™ Lockers are specifically designed to help overcome this and provide a secure, easy and safe solution.

A choice of sizes to suit many applications, all with locking and colour options.

Lockers are fully portable as a single unit - simply place the unit in a convenient location, plug the unit into a power point and the lockers are ready for use.

CE marking is a declaration by Moresecure that In Charge™ Lockers meet all the appropriate provisions of the relevant legislation implementing certain European Directives. The initials 'CE' ultimately mean that Moresecure satisfy the applicable European Directive(s).

All painted components are protected with BioCote. BioCote is a patent-protected microbial powder coating which inhibits the growth of potentially lethal bacteria and fungi.

All doors are independently earthed to the locker body.

One side of the locker and the doors are perforated to help prevent heat build-up during charging.

Choice of locks to suit different applications. See back page.

Each shelf has an additional front-to-rear reinforcing box section to strength.

Each compartment is fitted with either one or two standard UK three-pin sockets depending on the locker size.

Power lead is supplied with fitted RCD plug. Lead plugs into the In Charge™ Locker enabling easy replacement of the lead if damaged.

Supply Voltage 230v. The maximum current consumption in normal use is 13 amp.

Tool Lockers

Designed for use in site cabins on building sites or in locations which have high usage of trades using cordless tools, these lockers keep expensive battery chargers safe.

- Choose from four-, six- or eight-doors.
- Single or double socket in four- or six-door lockers, single socket in eight-door locker.
- Key-operated cam locks or Hasp & Staple fitting (for use with a padlock) fitted as standard. Other locks available, see back page.
- Available in nests of one, two or three.
- Choice of door colours, see back page.

Five-Door Locker

Height - 900mm	
Width mm	Depth mm
300	300

BioCote® Paint Finish

Epoxy-polyester powder coat colours with BioCote® protection.

Standard Body Colour

Standard Door Colours

Extended range of door colours available, ask for details.

Lock Options

Standard Deadlock

This simple and economical cam lock provides user access with a small, easily replaced key. The lock is supplied with two keys and a master key is available.

Hasp & Staple Padlock Fitting

Transfers responsibility for locking to the user. The user is required to secure the locker with a padlock (not supplied). This system provides flexibility at the loss of some control over allocation of lockers.

Coin/Token Return

Ideal when lockers have 'shared' users. The key is released when a coin or token is inserted. The key is captive again when the door is reopened and the coin/token is returned to the user.

Digital Combination

Simple-to-use, battery-operated keyless lock. Can be programmed for dedicated single-user or multi-user 'open access' mode. Personal entry code can be set and changed, whilst a preset master code ensures supervisor access.

Locker type

- 4-, 6- & 8-Door Tool Locker
- 10-Door Laptop Charging Unit
- 1-Door Laptop Charging Unit
- 5-Door Laptop Charging Unit
- 5-Door Personal Item Locker
- 4-Door Personal Item Locker
- 8-Door Personal Item Locker

Sloping Tops

Sloping tops are available as a factory-fitted option. These prevent litter being left on locker tops and makes their cleaning easier.
